

# SELECT SAFE.

SELECT REGISTRY

— 2020 —

For nearly 50 years, Quality Assurance is what has made Select Registry distinct and differentiates our properties from other independent lodging properties. Each new member must pass a rigorous quality assurance evaluation before being introduced to the traveling public as part of the Select Registry collection of properties. Once a member, properties are routinely monitored to ensure they maintain the high quality standards set forth by Select Registry.

The Select Registry Quality Assurance evaluation is an in-person, overnight assessment that evaluates every aspect of the guest stay from booking through check out. Every member of our team of professional evaluators has more than a decade of experience in the hospitality industry. Areas that are assessed as part of our 525-point Quality Assurance Evaluation include, but are not limited to, interior and exterior physical plant maintenance, food and beverage offerings on property, cleanliness, safety and security, and hospitality.

Select Registry's new "Stay Safe, Stay Select" program is a self-certification program based on recommendations by the CDC, US Travel, AHLA and other industry leaders. The program is designed to help Select Registry members communicate to travelers the various enhanced cleaning, sanitation and operational procedures that are being undertaken to protect guests and staff in the era of COVID-19. To see a complete list of the "Stay Safe, Stay Select" safety protocols, please visit <https://selectregistry.com/select-safe-stay-select/>.
